

TREFOREST GLASS

Torcello & Torcello Vintage

Two Beautiful Restoration Products

If your project requires the authentic look of imperfect glass, *Torcello* and *Torcello Vintage* will bring your projects to life!

Our restoration glass revives the charm of traditional period windows, with the huge advantage that it can be toughened (4mm), or incorporated into double glazed units with excellent u values. It can also be bent, whilst retaining the waviness and irregularities that make it so attractive.

The imperfections in *Torcello* and *Torcello Vintage* restoration glass beautifully refract light, making it ideal for using where a realistic match must be made. It is perfect for Historic Window Glass Restoration, the re-creation of Listed Buildings and antique furniture restoration.

Our *Torcello* restoration glass is softly subtle, and can be sealed into double glazing, whereas, the *Torcello Vintage* has additional distortion, which is only appropriate for glazing as single glazed. We can incorporate *Torcello* into our Slim Low Sight Line Range of Units, which have a sight line of 6.5mm – 8mm as you require. When built with a 8mm krypton filled cavity and *Torcello*, the unit will achieve a centre pane u value of 1.1 W/m²k using our Heritage Warm Edge Super Spacer®.

Our products are available to be shipped nationwide. *Torcello* is available in 3mm annealed, 4mm annealed and 4mm toughened. We provide a 10 year guarantee on our units.
