

TREFOREST GLASS

Treforest Glass Manufacture Integrated Blinds in sealed Units using Pellini Screenline Blinds, sourced from Italy – The Best Manufacturer of Blinds in the World

There is a definite buzz about integrated blinds, particularly in conservatories and bifolding doors. They don't get damp, dusty or dirty and they can't be abused by little hands or paws.

There are many advantages to integrated blinds which might not be obvious on firstlook, for example they can offer an improvement in acoustics and additional privacy due to the edge-to-edge slats.

TREFOREST GLASS

Screenline Blinds by Pellini

This great name in blinds speaks for itself in quality. The system can be manufactured with a Pull Cord; a Sliding Magnet or an electronic version, with all of these available in a range of colour options.

The Residential Blind range requires a minimum unit cavity of 20mm and the Commercial Range from 22mm upwards.

Colour swatches are available on request.

Venetian Blinds, Pleated Blinds or Roller Blinds are manufactured in a range of different colours and sizes, which are different for each type of blind and model, so there'll be blinds suited to almost every residential or commercial property. Venetian blinds are built with an advanced tilting and lifting blind system.
